

Building Blocks of Pupil Premium Success

NFER research identified seven building blocks for interventions to raise the attainment of disadvantaged pupils:	Whole school ethos of attainment for all
Addressing behaviour and attendance	High quality teaching for all
Meeting individual learning needs	Deploying staff effectively
Data-driven and responding to evidence	Clear responsive leadership

Use the seven building blocks as discussion points. Spend time together noting how well your school/group of schools are tackling these key areas. Identify strengths and weaknesses, then prioritise the areas for development.
